Schedule F : Selected Explanatory Notes Pursuant to FRS 134

1. Accounting Policies and method of computation

The quarterly financial statements have been prepared in accordance with Financial Reporting Standard (FRS) 134: Interim Financial Reporting and paragraph 9.22 of the Listing Requirements of Bursa Malaysia.

The accounting policies and methods of computation adopted by the Group for the interim financial report are consistent with those adopted in the financial statements for the year ended 30 September 2011.

2. Auditors' report

The auditors' report of the preceding annual financial statements of the Company and of the Group was not subject to any qualification.

3. Comment on seasonality or cyclicity of operation

The Group's performance is normally not affected by seasonal or cyclical events on a year to year basis. However, on a quarter to quarter basis, the demand for certain group products such as soft drinks may be skewed towards major festivities.

4. Unusual items due to their nature, size or incidence

The financial statements have been impacted by the cessation of Coca-Cola business, the recognition of flood related property damage losses and the associated insurance claims in relation to the Group's production facilities in Rojana, Thailand. Other than as disclosed, there were no unusual items affecting assets, liabilities, equity, net income or cash flows during the quarter. Foreign currency translation difference of negative RM5.5 million in the Statement of Comprehensive Income under "other comprehensive income" relates to the foreign currency loss arising from the translation of its Thai subsidiary as a result of the weaker Thai Baht.

Unusual items related to flood affecting income/(expense) are summarised below:

Unusual items related to flood in Thailand	Current Quarter	Cumulative 2nd Quarter
	RM'000	RM'000
Write-offs of building, plant & machinery (P&M) & inventories related to property damage (at book value)	^(a) (29,925)	(89,440)
One-off expenses related to flood	(1,690)	(4,140)
Interim claims on property damage (at replacement or book value)	^(a) Nil	^(b) 80,699
Business interruption (BI) claim	^(c) 19,933	19,933
Provisional (deficit)/excess	(11,682)	7,052

(a) Insurance claims relating to these damages are currently being processed. Such claims will only be accounted for in the financial statements upon approval by the insurers.

(b) As at the date of announcement RM74 million has been collected from the insurers.

(c) Provisional sum approved by insurers in respect of Q1FY2012; subject to final adjustments.

5. Significant estimates and changes in estimates

Save for the estimates relating to flood losses and insurance claims, there were no significant estimates or changes in estimates that have had any material effect on the results of the current quarter. Losses relating to components of groups of plant and machinery which are not separately identifiable are estimated based on their current replacement cost discounted for price inflation less accumulated depreciation. The amount of insurance claim pertaining to plant and machinery are estimated based on their current replacement cost. The claim pertaining to BI is computed based on the projected loss of profit arising from reduction in turnover. Whilst approval in principle has been obtained in respect of claims submitted previously, these claims are still subject to further review by the loss adjustor.

Schedule F : Selected Explanatory Notes Pursuant to FRS 134 (cont'd)

5. Significant estimates and changes in estimates (cont'd)
 Losses recognised to date only reflect damage that has been uncovered and quantified to date. The full extent of the property damage will only be known when the Rojana factory returns to normal operations after restoration work has been completed.
6. Issuance or repayments of debt/equity securities
 There have been no issuance, cancellation, repurchases, resale and repayments of debt and equity securities in the current financial quarter except for the issuance of 12,200 and 225,300 ordinary shares pursuant to its Executives' Share Option Scheme at the exercise price of RM7.17 and RM7.81 each respectively.
7. Dividends paid
 A final single tier dividend of 47 sen per share amounting to RM169.6 million (2010: RM136.2 million) together with a special single tier dividend of 15 sen per share amounting to RM54.2 million (2010: RM394.3 million) in respect of the financial year ended 30 September 2011 were paid on 17 February 2012.
8. Segmental results
 For management purposes, the Group's operating businesses are organised according to products and services, namely soft drinks, dairy products and property/others. Segment performance is evaluated based on operating profit. Inter-segment transactions and pricing arrangements where applicable, are determined on a commercial basis. The results by segments for the quarter are as follows:

Schedule F : Selected Explanatory Notes Pursuant to FRS 134 (cont'd)

8. Segmental results (cont'd)
Dairies Thailand's revenue declined significantly due to the shortage of finished products available for sales when its manufacturing plant in Rojana was shut down as a result of wide spread flooding. The operating loss has taken into account manufacturing and operating overheads incurred during the quarters. The operating loss was insured under the Group's Business Interruption (BI) insurance policy for which a provisional sum of RM20 million has been approved by the insurers in respect of Q1FY2012.
9. Valuation of property, plant and equipment
There were no changes in the valuation on property, plant and equipment since the last annual financial statements.
10. Subsequent events
There were no material events subsequent to the end of the quarter that have not been reflected in the current financial quarter.
11. Changes in the composition of the Group
There were no changes in the composition of the Group during the financial quarter save for formation of joint venture with FCL Centrepoint Pte Limited (FCLC), a subsidiary of Frasers Centrepoint Limited to develop the 13-acre ex-dairy factory premises along Section 13, Petaling Jaya as approved at the EGM held on 13th Jan 2012.

With the announcement of the completion of the transactions on 18 January 2012, the Group has effectively divested 50% of its interest in the development land in PJ Section 13 and had recognised RM55 million in the quarter being 50% of the capital gain of RM110 million.

12. Contingent liabilities
There were no contingent liabilities of a material nature since the last annual balance sheet date.
13. Contingent assets
Apart from the pending insurance claims relating to Property Damage and Business Interruption Loss during Q2, there were no contingent assets of a material nature since the last annual balance sheet date. Schedule G : Additional Disclosures in Compliance with BURSA MALAYSIA Listing Requirements

1. Operations review

Current Quarter vs Corresponding Quarter last year

As explained in the previous quarter, the Group no longer distributes Coca-Cola products effective this financial year.

Group revenue declined 28% to RM730 million for the quarter. Excluding last year's revenue contribution from Coca-Cola and property division of RM135 million and RM60 million respectively, Group revenue was down 10% mainly due to the negative impact of the flood in Thailand.

Soft drinks revenue (excluding Coca-Cola) increased 7% to RM346 million on account of higher sales of Seasons, Redbull, the recently launched Zesta and Clearly Citrus, sales to the additional territory of Brunei and contract packing for export to its related company in Singapore.

Dairies Malaysia revenue, which has suffered continuous decline over the last 3 quarters, has finally stabilized at last year's level reflecting demand pattern post price increase. Exports to Dairies Thailand continued to help improve factory capacity utilization and recovery of overheads in the quarter. Partial commercial production commenced on schedule in late March at its new dairies plant located in the halal hub of Pulau Indah, Port Klang.

Dairies Thailand continued to source products from neighbouring countries and the Group's factory in Malaysia during the quarter and managed to deliver 54% of the revenue of the corresponding period last year. Quick action and intensive business recovery efforts over the last 6 months have enabled the Rojana dairies plant to recommence producing its sterilized and sweetened condensed milk products in March after a lapse of 6 months.

Group operating profit declined 65% to RM57 million compared with last year. The shortfall was mainly attributable to the absence of Coca-Cola contribution, the different timing between the accounting of operating losses in Thailand and recovery under its Business Interruption insurance policy and, higher raw material costs, particularly skimmed milk powder and sugar in the Dairies divisions, which were partly offset by the capital gain in the property division.

Group PAT of RM107 million, which declined by a smaller percentage of 19%, benefitted from the part recognition of deferred tax assets (DTA) of RM55 million in relation to the halal hub tax incentive granted to its Pulau Indah dairies plant.

Half year vs Corresponding Period last year

Group revenue declined 28% to RM1.5 billion for the first half. Excluding Coca-Cola's revenue contribution of RM269 million last year, Group revenue was down 17% mainly due to the loss of revenue in Thailand as a result of factory closure due to flood, lower sales in Dairies Malaysia and the absence of property sales even though the non-Coca-Cola soft drinks revenue had increased by 8%.

Group operating profit declined 62% to RM110 million compared with last year. The shortfall was mainly attributable to the absence of Coca-Cola contribution, the different timing in the accounting of operating losses in Thailand and recovery under its Business Interruption insurance policy, higher shifting expenses and accelerated depreciation relating to the Dairies plant in PJ.

Schedule G : Additional Disclosures in Compliance with BURSA MALAYSIA Listing Requirements (cont'd)

2. Comment on material change in profit before taxation vs preceding quarter

Group PBT for the quarter of RM58 million was 8% higher than the preceding quarter mainly due to recognition of capital gain by its property division which made up for the lower soft drinks contribution, higher operating losses in Thailand and a provisional deficit in insurance claim.

3. Prospects for the current financial year

As previously explained, the operating performance for the Group will be much lower than that of last year due to the absence of the Coca-Cola business.

As seen in first half, several actions taken by the soft drinks division to date has already positively lifted its revenue by 8% (on a comparable basis, by excluding last year's Coca-Cola revenue). Such non Coca-Cola activities will continue and be intensified in the coming quarters.

For Dairies Malaysia, production at its new Pulau Indah facilities has just commenced. The shift is expected to be completed by September 2012. Consequently, operating efficiencies will be impacted and operating costs will rise in the short term. The estimated balance of RM21 million in DTA in relation to halal hub tax incentive granted to its Pulau Indah dairies plant will be recognised in second half upon the remaining lines commencing commercial production.

With the Rojana dairies plant in Thailand back in production during the second half, operating results for Dairies Thailand will see a recovery as compared with that of first half.

In conclusion, while the operating results of the Group will be much lower than that of last year due to the absence of the Coca-Cola business and the challenges faced by the Dairies business in Malaysia and Thailand, the overall results of the Group will be bolstered by the non-operating items of the recognition of deferred tax asset and crystallisation of capital gain (Schedule F, Note 11) during the year.

4. Tax expense

The details of the tax expense are as follows:-

RM'000	Current Quarter	Cumulative 2 nd Quarter
Current	6,589	20,223
Tax under provided in previous years	127	127
Deferred tax	(56,077)	(57,917)
	<u>(49,361)</u>	<u>(37,567)</u>

The Group's effective tax rate on continuing operations in the current quarter is lower than the statutory rate as the capital gain of RM55 million (Schedule F, Note 11) is not subjected to tax. For the current quarter, a deferred tax asset of RM55 million was recognised in relation to halal hub tax incentive.

5. Status of corporate proposal

There were no outstanding corporate proposals or new announcements made in the current financial quarter.

Schedule G : Additional Disclosures in Compliance with BURSA MALAYSIA Listing Requirements (cont'd)

6. Group borrowings and debt securities

The details of the Group's borrowings as at 31 March 2012 are as follows:-

RM'000	<u>Currency</u>	<u>Current</u>	<u>Non-Current</u>
Unsecured loan	RM	56,000	-
Commercial paper (CP)	RM	80,000	-
Medium term notes (MTN)	RM	100,000	150,000
		<u>236,000</u>	<u>150,000</u>

The CP/MTN is secured by an unconditional and irrevocable corporate guarantee from the Company.

7. Pending material litigation

There was no pending litigation of a material nature since the last balance sheet date.

8. Proposed Dividend

The Directors are pleased to declare an interim single tier dividend of 20 sen per share (2011: 20 sen) for the financial year ending 30 September 2012. This dividend amounting to RM73 million will be paid on 1 August 2012.

The entitlement date for the above dividend shall be 5 July 2012 and a depositor shall qualify for entitlement to the dividend only in respect of:

- (a) Shares transferred to the depositor's securities account before 4.00pm on 5 July 2012 in respect of ordinary transfer; and
