- (iii) which have arisen which render adherence to the existing method of valuation of assets or liabilities of the Company and of the Group misleading or inappropriate, or
- (iv) not otherwise dealt with in this report or financial statements of the Company and of the Group which would render any amount stated in the financial statements and consolidated financial statements misleading.

As at the date of this report, there does not exist:

- (i) any charge on the assets of the Company or of the Group which has arisen since the end of the financial year which secures the liabilities of any other person; or

notes to the financial statements

30 September 2000

1. SIGNIFICANT ACCOUNTING POLICIES

(a) Accounting convention

The financial statements are prepared under the historical cost convention, modified by the revaluation of certain fixed assets, and comply with approved accounting standards in Malaysia.

(b) Basis of consolidation

The consolidated financial statements include the financial statements of the Company and its subsidiary companies made up to 30 September 2000. All significant inter-company balances and transactions are eliminated at Group level. Goodwill or reserve on consolidation represents the difference between the purchase consideration and the fair value of the underlying net assets of the subsidiary companies acquired. Goodwill on consolidation is netted off against reserve on consolidation and the net amount is carried forward.

The results of the subsidiary companies acquired or disposed of during the year are included in or excluded from, the respective dates of acquisition or disposal, as applicable.

(c) Fixed assets and depreciation

Fixed assets are stated at cost or valuation less accumulated depreciation. The cost of an asset comprises its purchase price and any directly attributable costs including interest cost capitalised in bringing the asset to working condition. Expenditure for additions, improvements and renewals are capitalised and expenditure for maintenance and repairs are charged to the income statement. When assets are sold or retired, their cost and accumulated depreciation are removed from the financial statements and any gain or loss resulting from their disposal is included in the income statement.

Where fixed assets are revalued, any surplus on revaluation is credited to asset revaluation reserve. A decrease in net carrying value arising from revaluation of fixed assets is charged to the income statement to the extent that it exceeds any surplus held in asset revaluation reserve relating to the previous revaluation of the same class of assets.

Depreciation is calculated on the straight line method to write off the cost or valuation of the fixed assets over their estimated useful lives. No depreciation is provided for freehold land and capital work in progress. The annual depreciation rates used to write down the fixed assets over their estimated useful lives are as follows:-

Leasehold land	-	lease term (ranging from 12 to 99 years)
Buildings	-	2% to 5%
Plant and machinery	-	8% to 14%
Motor vehicles	-	10% to 20%
Postmix and vending machines	-	10%
Furniture, fittings and computer equipment	-	10% to 20%

(d) Investments in subsidiary companies

Investments in subsidiary companies are stated at cost. Provision for diminution in value is provided when the Directors are of the opinion that there is a permanent decline in value.

1. SIGNIFICANT ACCOUNTING POLICIES (Cont'd)**(e) Stocks**

Stocks are valued at the lower of cost and net realisable value. Cost is determined on a weighted average basis. Cost of finished goods and work-in-progress includes raw materials, labour and an appropriate proportion of production overheads.

Moulds included in consumables are written off over a period of three years from the date they are issued for production.

Engineering stocks are valued at the weighted average cost basis less appropriate allowance for obsolete items.

Container stocks comprise both containers on hand and estimated to be in the market.

(f) Trade and other debtors

Debtors are valued at anticipated realisable value. Specific provisions are made for debts which have been identified as bad or doubtful. In addition, general provision are made to cover for possible losses which are not specifically identified.

(g) Provision for staff retirement benefits

Provision for retirement and service benefits is made in accordance with the terms of agreements concluded by the group companies with various categories of employee.

The provisions represents the present value of the amounts likely to become payable in respect of services already rendered. An independent actuarial calculation of the provision is made every three years. Internal calculation of the provision is made each intervening year on the same basis as those used for the independent actuarial calculation. Based on the latest available actuarial valuation carried out between 30 September 1998 and 30 September 2000, the provision for retirement and service benefits is sufficient to meet the actuarially determined value of vested benefits.

(h) Provision for furnace shutdown

Provision for furnace shutdown is based on the estimated expenditure for major repairs and maintenance to be incurred over the period prior to scheduled shutdown of furnaces.

(i) Foreign currencies

Foreign currency transactions are recorded in Ringgit Malaysia at rates of exchange approximating those ruling at transaction dates. All other foreign currency monetary assets and liabilities are translated at the rates ruling at the balance sheet date. Exchange differences are dealt with in the income statement.

On consolidation of subsidiary companies, the assets and liabilities of foreign subsidiary companies are translated into Ringgit Malaysia at rates of exchange approximating those ruling at the balance sheet date. Profit and loss items are translated into Ringgit Malaysia at average exchange rates ruling during the year. Exchange differences arising for those translations are taken to revenue reserve.

1. SIGNIFICANT ACCOUNTING POLICIES (Cont'd)**(j) Deferred taxation**

Deferred taxation is provided, using the liability method, on all material timing differences arising from the treatment of certain items for taxation and accounting purposes. However, no provision is made for deferred taxation if there is reasonable evidence that such tax deferrals will continue in the foreseeable future and there are no indications they will reverse thereafter.

Deferred tax benefits are only recognised when there is reasonable expectation of realisation in the near future.

(k) Deferred expenditure

Deferred expenditure is stated at cost less amortisation and comprises:

- (i) Pre-operating expenses which are amortised over a period of three years commencing from the date of commercial production; and
- (ii) Bond issue expenses capitalised are written off to the income statement from the date of issue to the date of maturity.

(l) Cash and cash equivalents

Cash and cash equivalents consists of cash on hand, balances and deposits with banks and highly liquid investments which have an insignificant risk of changes in value.

(m) Revenue*Group*

Revenue comprises the net invoiced value of the sales of soft drinks, glass containers, dairy products and rental income.

Company

Revenue comprises dividend from investments.

(n) Net financing cost

Interest is recognised in the income statement on a time proportion basis taking into account the principal outstanding and rate applicable. All interest and related costs are expensed as part of financing cost. Net financing cost comprise interest payable on borrowings and interest receivable on funds invested.
